Subject: [HIREP Wind EIS] New Comment

A New Comment has been Submitted

I understand your reasoning for wanting to use Molokai & Lanai to produce power to Oahu due to the constant amount of wind thats generated on our island HOME. For me personally, I am totally against the State's idea of wanting to use our home to erect these ugly and intrusive structures called windmills to generate power for Oahu. Would any deciding members of this project like to have one of these enormous windmills erected in their community? Do you realize how enormous these things are??? Have Oahu resolve the problems that they brought upon themselves by themselves. Why intrude on Molokai & Lanai? Have they come up with a solution to help us resolve our energy crisis here on Molokai in the past? Nada!! No windmills on Molokai!!!
