Hawai'i Interisland Renewable Energy Program: Wind

Comments must be postmarked by March 1, 2011.

Thank you for participating in the public meeting process for the Hawai'i Interisland Renewable Energy Program: Wind - Environmental Impact Statement. We invite you to use this form to provide your public comments for consideration as we prepare for the Draft Environmental Impact Statement (DEIS).

When providing your comments, please be as specific as possible. Also, please write clearly so we can read your comments. If you complete this form at today's meeting, you can drop it in the comment box provided. If you do not wish to complete your comments during this meeting, this form is designed so you can take it home, fill it out, and easily mail it in (see the other side for directions). Your input into this scoping process is needed and appreciated. If you wish to be notified of the availability of the Draft EIS, please check here [] and provide your name, mailing address and/or e-mail address below.

COMMENTS

- How large will the converter station site / AC to DC / acres?
- How will the ground connect to other location? - ie what are the fault lines to be used?
- How large a quarry is needed to provide rock for roads?
- How will road changes be addressed?
- How will decommissioning costs be handled?
- Has an economic impact study been done regarding value of open space, agricultural land, etc?
- How does the cost of individual infrastructure really compare to massive industrial wind development, especially when the cost of the Helco power line is considered.
- The people's request seemed to be that the Environmental Impact Statement take into account whether the power line transmission or the wind site generation are properly at peace with the culture and history and hydrology of the island?
