

Written Comment Form Hawai'i Interisland Renewable Energy Program: Wind

Comments must be postmarked by March 1, 2011.

Thank you for participating in the public meeting process for the Hawai'i Interisland Renewable Energy Program: Wind - Environmental Impact Statement. We invite you to use this form to provide your public comments for consideration as we prepare for the Draft Environmental Impact Statement (DEIS).
When providing your comments, please be as specific as possible. Also, please write clearly so we can read your comments. If you complete this form at today's meeting, you can drop it in the comment box provided. If you do not wish to complete your comments during this meeting, this form is designed so you can take it home, fill it out, and easily mail it in (see the other side for directions). Your input into this scoping process is needed and appreciated. If you wish to be notified of the availability of the Draft EIS, please check here [] and provide your name, mailing address and/or e-mail address below.

Name: Jessie F. Myers E-mail Address: _____

Mailing Address: PO Box 630481, Lanai City, HI 96763

I am bi-lingual and migrated from a village in the Philippines in 1971. I graduated high school on Lanai, went to college in Honolulu, and came back to this place where I wanted to raise my family.

COMMENTS

Now, I have 2 children and live w/ my husband here. All of us love this place and no comparison to other places that I've been: mainland, east coast of Philippines. We all love to see the different places on this island and find time to relax, fishing, camping, and even hiking. I like to see changes, especially when it promises to save the earth. Although my husband & I are getting old, we look forward to a good retirement here on Lanai, and build a better place for our children & their children someday. When I heard about the wind mill project, I thought of it as good but I didn't realize it's big and enormous. I cannot see Lanai w/ 200 mills in that important part of the island. I know the places, I go w/ my husband a lot there for sight seeing, hiking and so forth. Why not try to put only a few and see if it will make a difference. Now, I am concerned what will it do to the fishes on the ocean, erosion of soil, the wild animals, the migrating birds, the noise, the scenery and the Hawaiian history that should be preserved always for generations to see and appreciate. I love to preserve history because I would like the stories to be passed on to the little Keikis and for them to appreciate. I appreciate the Hawaiian culture and traditions and for any cultures, it is a sensitive issue for me. How about the money to be spent? →

Ways to provide written scoping comments:

1. Complete this form today and leave it and/or other written comments in the comment box provided.
2. Mail this form and/or other comments, postmarked by March 1, 2011, to the address provided below.
3. Fax this form and/or other comments to: (808) 586-2536 by March 1, 2011.
4. Submit comments through the program website at: www.hirep-wind.com by March 1, 2011
5. Send your comments by e-mail to: hirep@dbedt.hawaii.gov by March 1, 2011

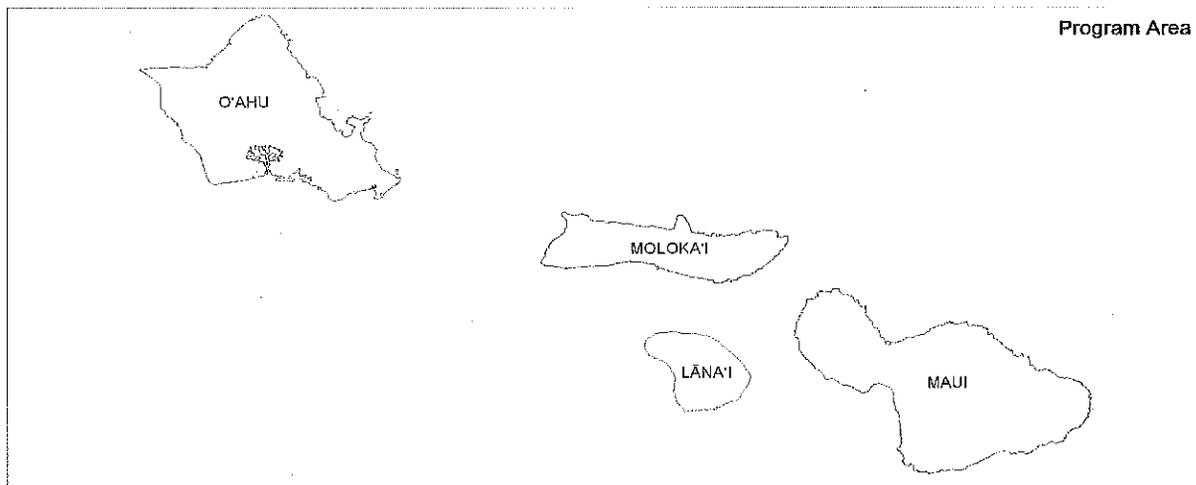

If you wish to mail this form, please fold in thirds, make sure the address is showing, tape closed, and affix postage. Thank you!

Are we (the people) going to be assessed by our taxes? Yet, energy will not come to Lanai at all. Why are we being left out. If we are going to see these changes, why not Lanai people included when

COMMENTS

the energy produce on our island? We are always last of every thing. It is so unfair.

I would like to see the dirt roads are still accessible to fishing areas. How about the hunters? All my brothers hunt and we all eat the healthy meat of deer and rams. I do not want these places to close for that.

The possible erosion of soil because of the heavy construction that will happen near the banks of the water. Consider also the Hawaiian trails and those mark places where special species live. What will happen to them? How about the noise that will always blow by the trade wind to the city. The city is not that far for 200 mills. The life styles on Lanai will take a tremendous change and it will not be a place where people come and look forward in visiting because of these mills' changes. The serenity and peacefulness will be gone, it will not be the same. Overall - although I like the idea of saving the earth, I would not trade in to all the things I mentioned here and there are more. Again, lower amount of mills would be okay for me to try, but not 200 or even less. Fun to start and Lanai to be benefited on the energy as well is more open to me. Please do your →

best to study all the impacts and still preserve the island: its cultural, historic, life style and the impact on resources & activities on Lanai. ~~Consider the impact that people~~ Consider the impact that people will move out on this island because of all these windmills. Consider the plants & trees that will no longer grow on those areas. Not just bad but it may create erosion because of the lack of plants growing there.
