Testimony of SCOTT J. GLENN, Chief Energy Officer

before the HOUSE COMMITTEE ON FINANCE

Tuesday, April 5, 2022 2:30 PM State Capitol, Conference Room 308 & Videoconference

SUPPORT SB 2720, SD2, HD1 RELATING TO ENERGY.

Chair Luke, Vice Chair Yamashita, and Members of the Committee, the Hawaii State Energy Office (HSEO) supports SB 2720, SD2, HD1, which allows new electric vehicle charging stations and certain upgrades having a single port to qualify for a rebate, removes the \$500,000 cap on the electric vehicle charging station rebate program, specifies that no rebates shall be approved after available funds are exhausted for the fiscal year, increases flexibility of the Public Utilities Commission to administer the electric vehicle charging station rebate program, increases the percentage of funds that the Public Utilities Commission may use for administration of the rebate program from ten per cent to fifteen per cent, allows for marketing and outreach expenses to be included within allowable costs of the rebate program, and appropriates funds for the electric vehicle charging system rebate program.

The decarbonization of the ground transportation sector is essential to achieving a net-negative carbon economy as soon as practicable but no later than 2045. A foundational strategy to decarbonize the transportation sector is the adoption of zeroemission vehicles (ZEVs) and a material barrier to the adoption of ZEVs is fueling stations. Increasing the flexibility and reach of incentives for ZEVs fueling stations supports the ultimate elimination of fossil fuel for ground transportation.

Thank you for the opportunity to testify.
