Subject: [HIREP Wind EIS] New Comment

A New Comment has been Submitted

I don't think windmill is good idea for Hawaii.
It is not new Technology. Windmill is the old glory.
Hawaii has natural gift from the Sun.
In Oahu has many tall office buildings and condominiums.
Why make own electric from solar power?
If state has that kind of spending money, support to solar panel for family houses.
should take care school education and
save nature first. Once developing nature, never ever come back.
Windmill is not real green energy. I hear many peoples has health problem by windmill noise, all over the world.
Please leave Molokai and Maui alone and save our last real nature, native birds and animal sanctuary.
